Objective

Motivated and detail-oriented aspiring Front-End Developer skilled in JavaScript, React, Angular, Git, and REST API integration. Passionate about building responsive and user-friendly web interfaces using modern tools such as Figma and Tailwind CSS, while expanding full-stack development skills.

Education

BSc Computer Science

2022 – 2025

St. Pius X College, Rajapuram (Kannur University)

OGPA: 8.003 / 10

Relevant Coursework: Data Structures, Computer Networks, Software Engineering, Operating Systems, Compiler Design, Computer Organization, Information Security, Web Technology

Higher Secondary Education (Biology Science)

2020 – 2022

Government Higher Secondary School, Udma

GPA: 9.3 / 10

Experience

Full Stack Development Intern – Luminar TechnoLab

June 2025 – Present

Developing expertise in full stack web development using the MEARN stack (MongoDB, Express.js, Angular, React.js, Node.js). Building scalable applications with secure authentication and efficient data modeling. Designed responsive, user-friendly interfaces with React, Tailwind CSS, and Bootstrap, while expanding framework versatility through Angular.

Technical Skills

Front-End: HTML, CSS, JavaScript (ES6+), React, Redux, Angular, Material UI, Tailwind CSS, Bootstrap

Back-End: Node.js, Express.js, MongoDB

Tools: Git, VS Code, Figma

Operating System: Windows

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication

Projects

Cookpedia – MEAN web app

Developed a full-stack recipe application with Angular (frontend), Node.js Express (backend), and MongoDB (database). Implemented two modules: User (view, save, download recipes, add feedback) and Admin (manage recipes, edit/delete entries, view user feedback). Designed responsive UI with Bootstrap, ensuring a seamless user experience and efficient data handling.

College clubs and Event Management – MERN Web App

Developed a full-stack College Club Event Management System using React with Tailwind CSS for a responsive front end and Node.js with Express for the backend. Implemented secure authentication with JWT, file handling via Multer, and environment management using dotenv. Designed MongoDB schemas with Mongoose for clubs, events, and users, ensuring robust data modeling and seamless integration. Applied CORS middleware for cross-origin access and delivered a scalable, user-friendly platform for managing college clubs and events.
